

HIV Non Traditional Setting (NTS) Program

The **HIV Non Traditional Site (NTS)** outreach program is designed to provide quality HIV counseling, testing, and referral services at various community sites in New Hanover County. The program's goal is to reduce the spread of HIV/AIDS, Syphilis and other Sexually Transmitted Diseases (STDs) by increasing the number of testing and educational opportunities available to all individuals in the community.

If you are interested in scheduling a testing event or educational session at your site or need more program information, please contact the HIV Program Coordinator at (office) 910-798-6778.
